Berita Acara System Integration Test (SIT)

Changes ID	[Diisi dengan Nomor Proyek/CR/IC/AI/SC/IR/SR]
Changes Name	[Diisi dengan nama Changes]
Data of Request	[Diisi dengan tanggal diterbitkan]
IT Project Manager	[Diisi dengan nama PIC IT PM]
Team Lead Tester	[Diisi dengan nama Team Lead Tester]
Attachments	[Diisi Test Script SIT, Laporan SIT, termasuk daftar hadir dan screen capture hardcopy/soft copy]
Description	
Pihak-pihak yang bertandatangan di bawah ini menyatakan bahwa telah dilaksanakan System Integration Test (SIT), untuk [App ID - nama Aplikasi] - deskripsi singkat pengembangan dengan ruang lingkup testing/scenario yang tercantum dalam final test script SIT dengan hasil tercantum pada Laporan SIT. Seluruh test script yang disepakati bersama untuk dijalankan dalam SIT termasuk Impacted feature yang di informasikan oleh pihak pengembangan telah berstatus tested good.

Testing Schedule

[Testing schedule based on approved Project Charter document]

Activity	Milestone	Target Date	PIC
<Test Activity, if using vendor's methodology, use their term>	<Deliverable list from the activity to be received by BNI>	<The target date of submission>	<Name of the PIC responsible for the deliverable>

Risk & Mitigation Plans

[Define risks for testing and mitigation plan for all risks defined]

Test Phase	Risk	Mitigation	PIC
<Test Phase, where the identified risk will likely to occur>	<The identified risk>	<Detail the resolution of the issues here, agree with the related parties and stakeholders>	<Name of the PIC responsible>

Testing Scenario

[Describe the scenario for all phases]

Key	Value
Test Case ID	SB_TAPCASH_V2_001
Scenario	Top Up
Test Case	Normal Top Up
Expected Result	Success Top Up
Criteria	Normal

Document Attributes

Key	Value
Automation Tools	Katalon Studio
Apps	BNI Direct
Platform	Rest API

Test Execution Plan

[Functional Testing, Regression Testing, Integration Testing, Compatibility Testing, Load Testing, Performance Testing, Regression Testing, etc]

Test Type	Description
Regression Test	Testing with the intent of determining if bug fixes have been successful and have not created any new problems. Also, this type of testing is done to ensure that no degradation of baseline functionality has occurred
Unit Test	Unit tests ensure that each unique path of the project performs accurately to the documented specifications and contains clearly defined inputs and expected results
System Test	System testing ensures that the entire integrated software system meets requirements. It tests a configuration to ensure known and predictable results. System testing is based on process descriptions and flows, emphasizing predriven process links and integration points
Integration Test	Testing two or more modules or functions together with the intent of finding interface defects between the modules or functions
Functional Test	Functional test can be defined as testing two or more modules together with the intent of finding defects, demonstrating that defects are not present, verifying that the module performs its intended functions as stated in the specification and establishing confidence that a program does what it is supposed to do
Performance Test	Testing with the intent of determining how quickly a product handles a variety of events. Automated test tools geared specifically to test and fine-tune performance are used most often for this type of testing
Compatibility Test	Testing used to determine whether other system software components such as browsers, utilities, and competing software will conflict with the software being tested.
Load Test	Testing with the intent of determining how well the product handles competition for system resources. The competition may come in the form of network traffic, CPU utilization or memory allocation
Stress Test	Testing with the intent of determining how well a product performs when a load is placed on the system resources that nears and then exceeds capacity
